Faster. Smarter.

Quality makes product reliability! All Fujitsu products undergo rigorous and stringent testing.

Sturdy

- Drop test:** Ensures Fujitsu notebooks are durable and can withstand impact from accidental falls.
- Open-and-shut test:** Hinges are tested to exceed a lifespan of opening and closing.
- Shock test:** Ensures Fujitsu notebooks can withstand shock impacts while maintaining full functionality.
- Repeated pressure test:** A specified load is repeatedly imposed on the LifeBook to make sure that all keypad parts are unaffected by the loads.
- Vibration test:** Ensures Fujitsu notebooks are resistant and enduring even if subjected to rigorous vibrations.
- Concentrated pressure test:** Ensures screen does not crack or break easily under repeated pressure.
- Connector tension test:** Durability of connector ports is tested on respective interfaces such as AC adaptor, USB, PS/2 and PC card. Testing involves repeated insertion and removal, and pulling of cables with considerable force.
