SPECIAL FEATURE

- NVIDIA® Optimus™ for greatly improved battery life and mobility

THINKVANTAGE TECHNOLOGIES

Rescue and Recovery™ is a one button recovery and restore solution that includes a set of self recovery tools to help you diagnose, get help and recover from system crashes quickly, even if the primary operating system will not boot.

With **Access Connection**, users can seamlessly switch network, in the office or on the move, wired or wireless.

Secure Data Disposal shreds the data not the hard disk. Confidential information on a hard disk is erased quickly and simply.

Active Protection System features an integrated motion sensor that can detect sudden changes in motion and temporarily stop the hard drive to protect your valuable data from crashes due to everyday notebook accidents.

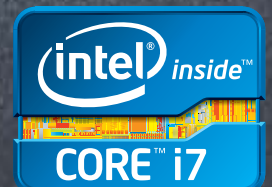

With **ThinkPad's Spill Resistant** Keyboard**, a simple accident with a cup of coffee could spell disaster for an ordinary notebook. The keyboard on the ThinkPad is designed to help prevent liquid spills from damaging the motherboard as it is sealed tight and sits on a tray with dual drainage holes. ThinkVantage Technologies for ThinkPad Models only.
