

## Procedure for Accessing to NYP SSL VPN Remotely

### Connecting to NYP VPN

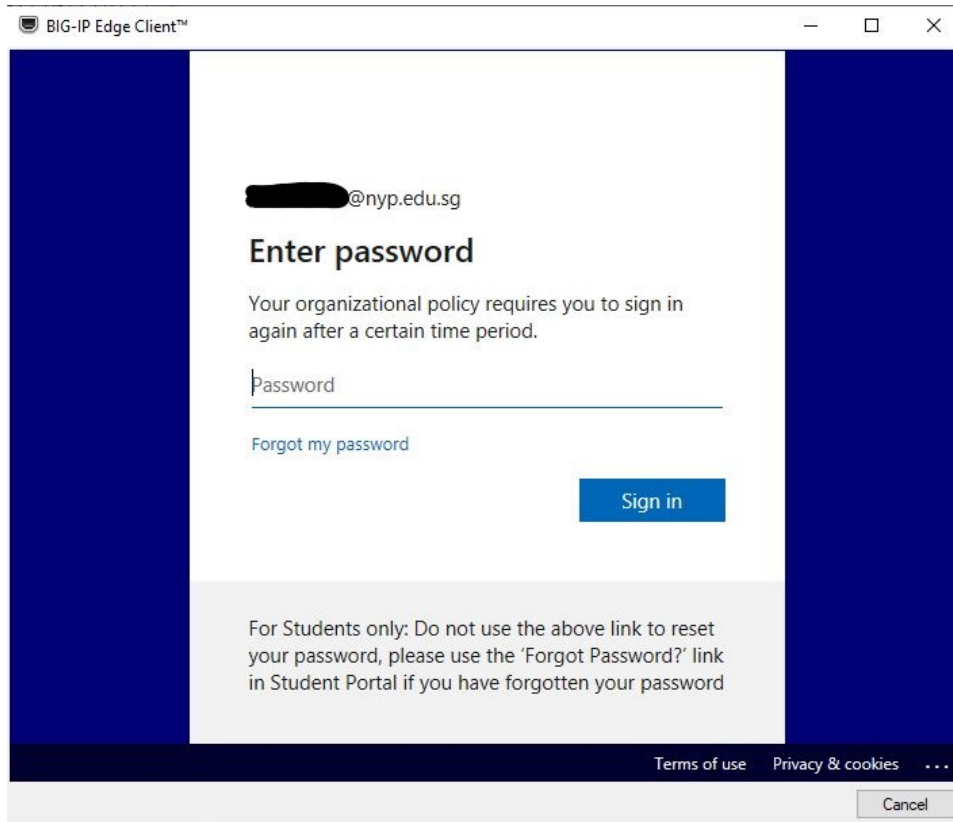

1. Double-Click on the “NYP VPN CLIENT” icon (Indicated by  on your desktop) to launch the NYP SSL VPN client:

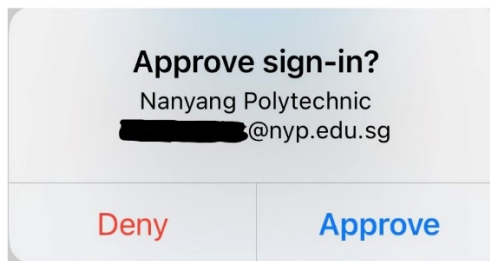

2. For first time, Click “Change Server”, type “vpn.nyp.edu.sg” and click “Next”.

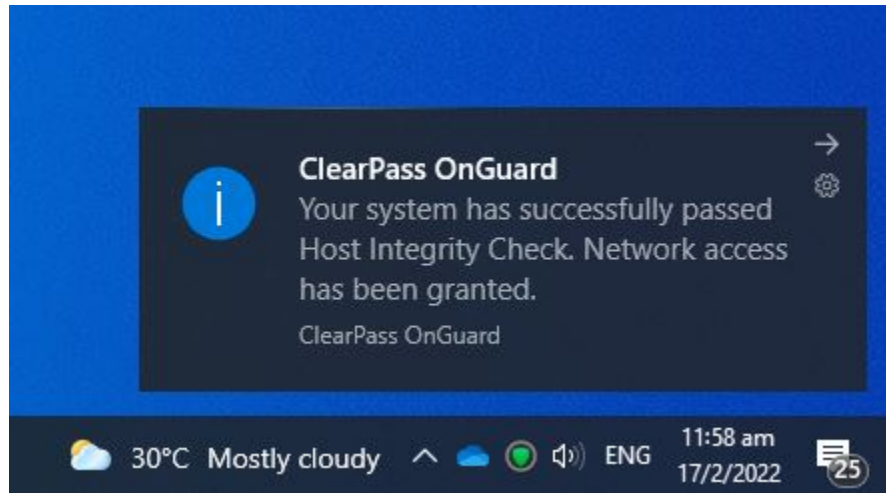

3. Click “Connect” and a login screen will pop out as shown below.

4. Please enter your “AD password” and click “Sign in”.
5. Please approve your login at Microsoft Authenticator of your MFA device.

6. After approved, please wait for Network Admission Control (NAC) to check anti-virus software and Windows Update. After NAC passed, NAC icon will turn colour from blue to green and a message box pop out indicting it was successful.

7. You can now proceed to access to NYP Intranet Resources (e.g. Launch staff email, Staffportal).

## **Disconnecting from NYP SSL VPN**

1. To disconnect from the NYP VPN CLIENT, right click on the  icon in the system tray and select "Disconnect".
