Over the years, we have established a strong international presence. With the setup of Nanyang Polytechnic International (NYPi) in August 2007, we have been able to bring the world to NYP and NYP to the world.

NYPi focuses on enhancing the NYP brand name in technical education and training beyond Singapore. It contributes to the strengthening of NYP’s existing international partnerships and collaborations, as well as creates more opportunities for students and staff to be engaged in international exchange and attachment programmes. NYPi also facilitates the conducting of courses for international participants who wish to learn more about NYP’s successful pedagogic and management concepts such as the NYP ‘Teaching Factory’ Concept, and those who wish to emulate the ‘Teaching Factory’ model. NYPi is a vehicle to extend the NYP ‘Teaching Factory’ model and other concepts, the polytechnic’s expertise and NYP’s education and training programmes into the region and beyond.

NYPi contributes towards the development of NYP into a global polytechnic of distinction. This was endorsed by then-Minister for Education Heng Swee Keat in his speech delivered at the dinner on 30 March 2012 to celebrate NYP’s 20th Anniversary: “NYP has made significant progress in twenty years, to deliver a world-class, high-quality polytechnic education to our young generation today.”

To date, NYPi has conducted courses for more than 16,000 international participants from over 40 countries worldwide. It offers programmes in NYP concepts for technical and vocational education and beyond.

These programmes provide opportunities for our staff to visit cities in regional countries and to interact with their senior officials and professionals. This allows them to better understand the countries’ social, economic and political trends and developments. As a result, our staff are able to incorporate a regional and international perspective into their teaching, helping our students gain a better appreciation and understanding of different cultures and practices. In addition, students have opportunities for overseas exposure from the four student project centres in China, which have been set up with the support of NYPi. They are located in Beijing, Suzhou, Guangzhou and Chengdu. NYPi and NYP aim to inculcate in our students a global mindset and inspire them to take on the challenges of a fast-changing world.

They have consistently given excellent feedback on the quality of training received, the professionalism and dedication of NYP staff, and the friendship and hospitality they have experienced. These programmes provide opportunities for our staff to visit cities in regional countries and to interact with their senior officials and professionals. This allows them to better understand the countries’ social, economic and political trends and developments. As a result, our staff are able to incorporate a regional and international perspective into their teaching, helping our students gain a better appreciation and understanding of different cultures and practices.

NYPi offers a wide range of manpower development programmes for overseas professionals, where training is customised to meet the specific requirements of the client organisations and participants. These programmes support the Singapore Government’s initiatives, as well as meet the training needs of the various overseas organisations.

Participants of the training programmes include senior government officials, academics, principals and specialist staff of technical colleges, and senior management staff from the public and private sectors.

PUBLIC SERVICE PREMIER AWARD
In 2012, the Public Service Division conferred on NYP the Public Service Premier Award, which recognises the sustained efforts of public agencies to achieve and maintain pinnacle levels of Organisational Excellence. NYP plays an important role in manpower development by providing industry-relevant polytechnic education and training. It pursues excellence by building on foundations anchored on organisational culture, concept, capability, and connection. Moulded by our values and shaped by our heritage and history, the NYP culture unites our people for a common purpose. As a Polytechnic committed to producing graduates who are innovative and enterprising, we stay up-to-date with advances in science and technology. We also develop effective and innovative approaches to succeed in our endeavours, as well as invest in our connections and collaborations with key industry players, government agencies, and other educational institutions.

ORGANISATIONAL EXCELLENCE JOURNEY

SINGAPORE QUALITY AWARD
NYP was conferred the Singapore Quality Award (SQA) in 2011, the highest award for business excellence in Singapore. This award is presented to organisations which have demonstrated outstanding management capabilities and delivered superior performance and results. The award assessment framework is aligned with those that are adopted in the United States, Europe, Japan and Australia, reflecting the best-in-class practices of world-class organisations. As part of the journey towards the SQA, NYP has been a member of the Singapore Quality Class (SQC) since 1999 and attained the SQC Star in 2010.

PEOPLE EXCELLENCE AWARD
NYP was conferred the People Excellence Award in 2005. This pinnacle award recognises the best-of-the-best People Developer organisations that meet criteria such as an exceptionally well-defined and innovative people development approach that is fully integrated with the needs of the organisation and its people, and a people development approach that is well-deployed in all key areas of the organisation and for all levels of staff.

While striving for excellence in teaching, curriculum, environment and administration, NYP has pioneered innovative business concepts and processes, and is among the first educational institutions to be awarded certifications in various areas of business excellence.
